It operates while the automobile is transferring at speeds of as much as 30 km/h (19 mph), in ahead or reverse equipment.

Seat Belts

The seat belts have inertia reels that robotically modify the strap and lock it at some stage in a collision, emergency braking or rollover. The the front seat belts additionally have pyrotechnic pretensioners and a pressure limiting machine for

stepped forward safety. Make positive it's miles steady. The decrease element ought to sit low over the pelvis and the higher element across the shoulder.

The belt have to be close to the frame, now not twisted or broken, and must handiest be used by one individual. Always put on a seat belt, even on brief trips. If a seat belt isn't always mounted, a caution lamp and, relying on the situations, an audible sign might also appear. After an effect or if a belt is damaged, have it checked by using a CITROËN dealer or qualified workshop. ASR and DSC assist keep grip and automobile stability. They need to remain activated, mainly in rain, snow and other hard situations.

If deactivated, the systems are automatically reactivated when the ignition is switched on again or while the automobile reaches approximately 50 km/h. Airbags paintings collectively with the seat belts to defend occupants for the duration of excessive collisions. They may not deploy in minor or rear influences, so seat belts remain important. Airbags perform only as soon as and do no longer paintings when the ignition is switched off. If the airbag warning lamp comes on, have the gadget checked with the aid of a CITROËN supplier or certified workshop.

Airbags

Never use the same seat belt for multiple toddler and by no means deliver a baby in your lap. Use an permitted baby seat suitable for the kid's size or weight and comply with the regulations in your us of a. Airbags paintings collectively with the seat belts to defend occupants at some stage in critical collisions. In a intense impact, they install quickly and then deflate to help defend the occupants. In minor, rear or positive rollover impacts, they'll now not set up, so seat belts remain crucial.

Front airbags shield the driver and the front passenger all through severe frontal influences. Lateral airbags protect the chest during critical aspect impacts, at the same time as curtain airbags help guard the top all through extreme aspect influences. Always sit upright, put on the seat belt successfully and hold gadgets far from the airbags. Do not attach whatever to the guidance wheel, dashboard, seat backrests or roof, and do now not alter the regions across the airbags. After an coincidence or if an airbag warning lamp comes on, have the gadget checked by way of a CITROËN dealer or certified workshop. All airbag repairs or modifications must be performed through a qualified workshop.

Child Seats & Adjustment

Always put on the seat belt successfully and sit in an upright position. Do not location your hands on the centre of the steering wheel or your feet on the dashboard. Do not smoke, cast off or pierce the steerage wheel, or attach some thing to the steering wheel, dashboard, roof or seat backrests, as this will cause injury while the airbags installation. Use only permitted seat covers which are well suited with lateral airbags. Do now not sit down unnecessarily near the door, and do not modify or restore the regions around the airbags or facet-impact sensors. Children underneath 12 years antique or shorter than 1.

Five metres need to use an approved toddler seat appropriate for his or her size or weight. Rear seats are endorsed for kids. Follow the child-seat policies relevant in your united states. Never installation a rearward-going through toddler seat at the the front passenger seat even as the passenger airbag is energetic. The front passenger airbag must be deactivated earlier than installing a rearward-dealing with child seat. If the automobile does no longer have an airbag deactivation manage, a rearward-facing child seat need to now not be mounted at the front passenger seat.

Use the child lock to help save you kids from opening the rear doorways and home windows. Never leave a child or animal alone inner a automobile, especially with the home windows closed in warm situations, and maintain the car keys out of kid's attain.
